Presented by

THE STUDENTS OF THE

UNIVERSITY OF ALABAMA

SCHOOL OF DENTISTRY

BIRMINGHAM, ALABAMA

VOLUME VI

Foreword

The Dentala of 1957 is designed to record the activities of one year of our lives. A year filled with happiness, sadness, doubts and friendship. It is my sincere hope that this volume in the future will bring to mind all the events of this year as pleasant ones. The moments of sadness, in time, will be memories of laughter, the periods of doubts will be remembered as foolish anxiety and the friendship found this year will be further cemented to form lasting bonds of brotherhood.

With this in mind, we present this Dentala of 1957 to you.

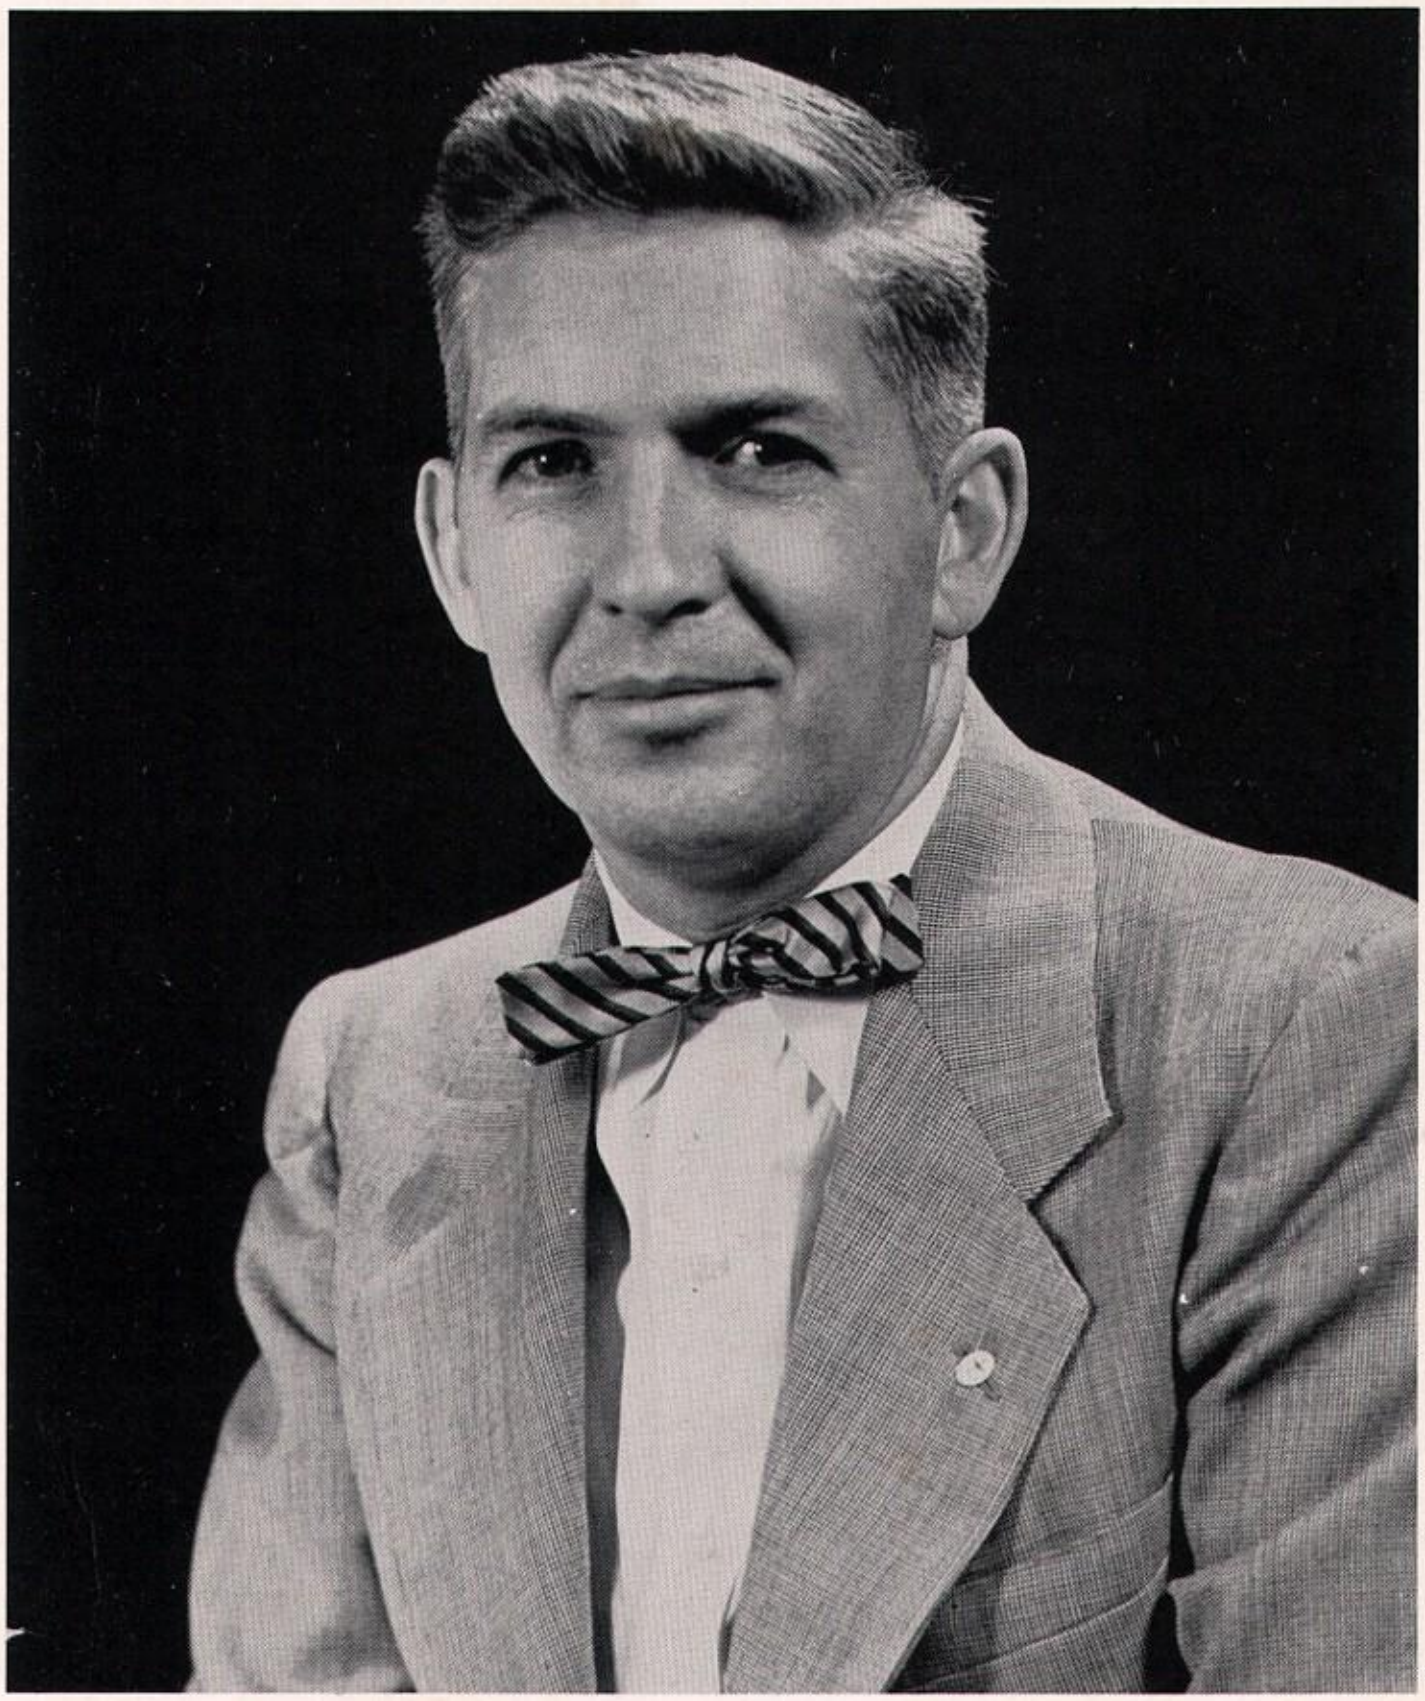
We Proudly Dedicate the 1957 Dentala to —



DR. JOSEPH F. VOLKER

Dr. Joseph F. Volker was born in New Jersey, March 9, 1913. In 1936 he received his D.D.S. degree from Indiana University School of Dentistry; A.B. in Chemistry, 1938; M.S. in Biochemistry, 1939; Ph.D. in Biochemistry, 1941, from the University of Rochester.

After an internship in dental surgery at Mountainside Hospital in Montclair, New Jersey, he held Carnegie fellowships at the University of Rochester School of Medicine and Dentistry, where he did basic research in the etiology of dental caries and ultimately became Assistant Professor in the department of Biochemistry at the University of Rochester School of Medicine. In 1942 he was appointed Professor of Clinical Dentistry at Tufts College Dental School, a position he held until his appointment as the Dean of the Tufts College Dental School in 1947. In 1948 he became dean of the University of Alabama School of Dentistry.

Dr. Volker led the infant University of Alabama School of Dentistry in less than ten years to one of the top ranking dental schools in the world. Under his able guidance many research grants have been given to not only the dental school but to the entire medical center as well.

It is with this in mind that we proudly dedicate this 1957 DENTALA to Dean Joseph F. Volker.

A Tip for Better Prophylaxis

PY-CO-TIP

The tip developed as the ideal for stimulation of interproximal spaces

Two years of research and extensive investigation went into the development of Py-co-tip. The high quality rubber is finely balanced for flexibility and stiffness to stimulate blood flow in the gingival areas. Py-co-tip is preferred by more dentists than any other brush-affixed stimulator.

THESE FEATURES MAKE PY-CO-PAY WIDELY ACCEPTED

- *Straight, rigid design*
- *Small, compact head*
- *Bristles uniformly trimmed*
- *Proper tuft spacing*
- *Scientifically designed tip*

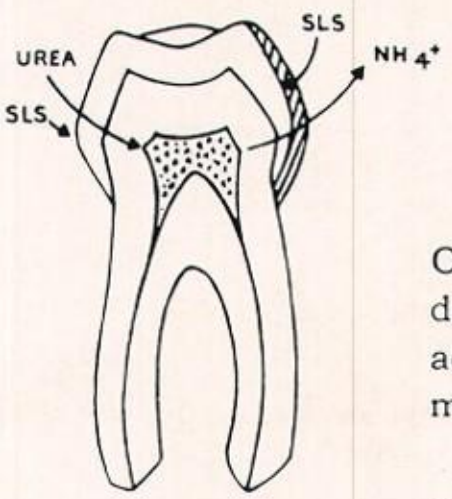
Amm-i-dent® *with SLS**

gives longest lasting protection

"INSIDE-OUTSIDE" ACTION

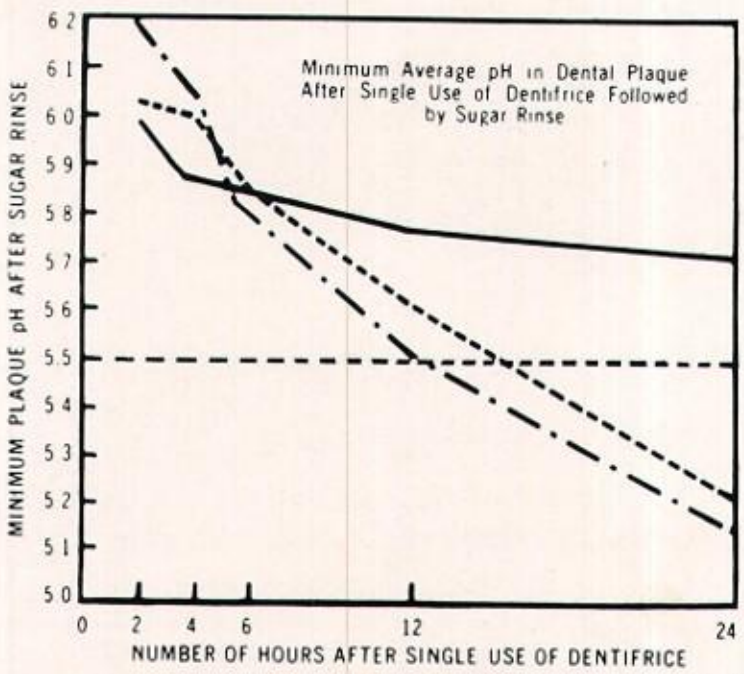
Lasts More Than 24 Hours



INSIDE . . . UREA penetrates to tooth pulp; *diffuses outward* as needed to hold tooth and plaque above decalcifying level of pH 5.5.

OUTSIDE . . . SLS adsorbs to enamel and plaque. A detergent with bacteriostatic, anti-enzyme and anti-acid properties, SLS effectively keeps pH above 5.5 for more than 12 hours.

Because High-Urea and Sodium N-Lauroyl Sarcosinate have synergistic action, New AMM-I-DENT with SLS provides longest lasting caries protection—pH above 5.5 for more than 24 hours.



(J. Dent. Children 21:194 [3rd Qt.] 1954.)

A Few Words About

COLUMBIA DENTOFORMS...

From a humble start 36 years ago, Columbia Dentoforms have played an increasingly important role in dental education. Today, every dental student in the United States and Canada "cuts" his first teeth on Columbia Dentoforms, for we supply Dentoforms to every dental college in the United States and Canada, as well as in many other lands.

In these 36 years, there have been many improvements and additions to Dentoforms to meet the ever more exacting demands of teachers. Today, Dentoforms number more than a thousand and present conditions that the student will encounter in practice. And in graduate years, Dentoforms continue to help clinicians in postgraduate education and to help the busy practitioner in his endless task of patient-education by showing the better dentistry he seeks to give.

Castle General Vision light. Special reflector gives diffuse room illumination. Adjusts for all ceilings.

Castle "777" Speed-Clave. Instruments, needles, gloves, compresses sterilized dry, ready to use. Faster than boiling. Fully automatic.

Castle PANOVISION. Clear, non-glaring light for intra-oral vision. Reduces shadow and glare.

This equipment helps you start your practice . . . and keep it growing

This combination of Castle lights and sterilizers helps you do the best possible job for your patients . . . and yourself.

PANOVISION reduces eye-strain and fatigue. Makes work easier and your day less tiring. General Vision light gives balanced illumination to your entire office. Cuts out annoying contrast between bright work area and rest of room.

New "777" Speed-Clave gives you autoclave safety at a price you can afford. Safer, quicker, and easier than boiling.

Selecting Your Laboratory

With Dentists who know values, the primary consideration when it comes to Laboratory service is technical knowledge and skill. Reputation—"record of performance," is of utmost importance. Reputations are built slowly, over a long period of years by fine quality and superior service.

When it comes to selecting your Laboratory, the deciding factors are quality, service, prestige—and other considerations less tangible than price, but much more important.

We have been in this business for forty-five years; this accumulated store of knowledge and experience is at your command.

NEW BRILLIANT NATURAL BEAUTY . . . MADE "ALIVE" BY UNIVAC 3-DIMENSIONAL EFFECTS

UNIVAC®

LIFELUCENT PORCELAIN ANTERIORS

Here at long last is an entirely new and radiant lifelucent porcelain of exquisite beauty . . . new glowing "aliveness" . . . new "living" colors and color dispersions. These have been integrated by advanced techniques and electronic processes, creating a natural 3-dimensional effect so brilliantly alive in the mouth that it is virtually impossible to distinguish them from vital teeth.

Univac Porcelain is not merely an improvement–it is truly a complete-ly new achievement of tooth porce-lain research and development. Call your Universal Dealer for a demonstration. *Do* see Univac An-teriors . . . see their light-absorbing properties so precisely matched-in-depth to human teeth. You'll *insist* upon Univac . . . *and only Univac* . . . for your patients. ★ ★ ★

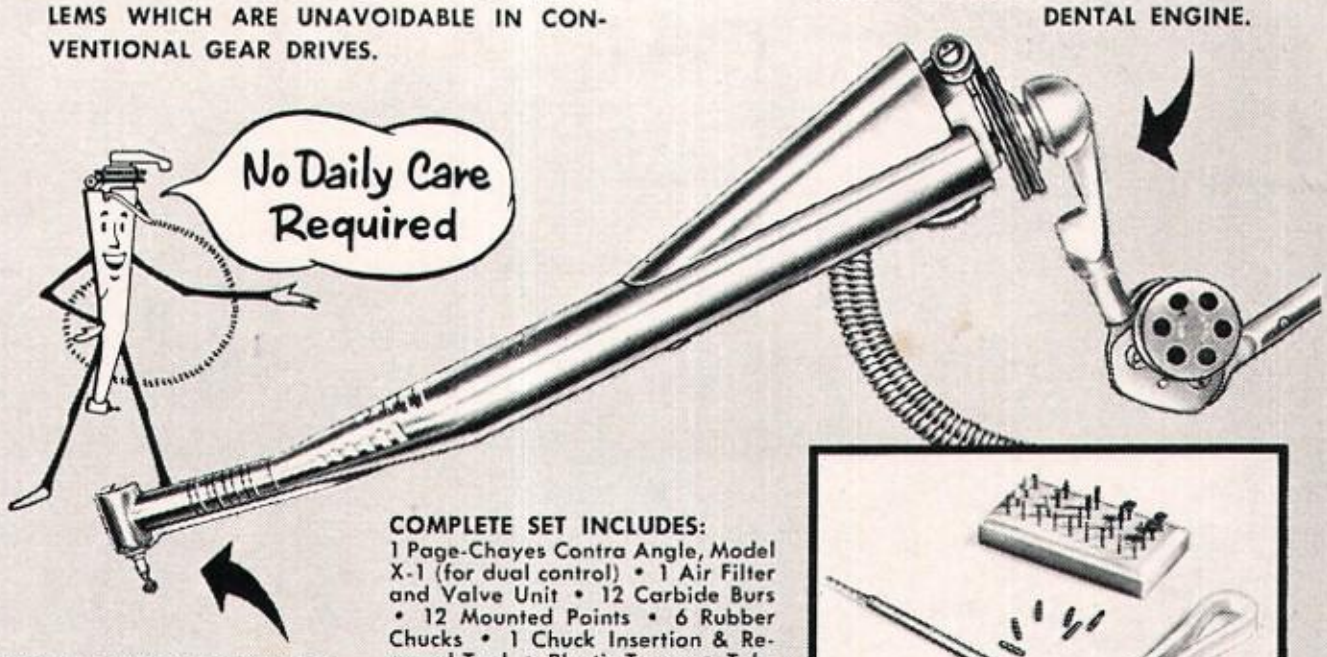
PAGE Chayes HIGH SPEED CONTRA ANGLE

NO GEARS. FULLY BELT DRIVEN. ELIMINATES VIBRATION, WEAR AND LUBRICATION PROBLEMS WHICH ARE UNAVOIDABLE IN CONVENTIONAL GEAR DRIVES.

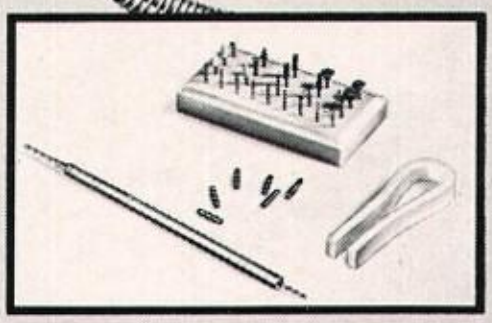
EQUIPPED WITH OWN WRIST JOINT, WHICH ATTACHES TO ARM OF ANY DENTAL ENGINE.



SIMPLE, EASILY CHANGED RUBBER CHUCK HOLDS BUR AND CUSHIONS IT AGAINST VIBRATION.

COMPLETE SET INCLUDES:
1 Page-Chayes Contra Angle, Model X-1 (for dual control) • 1 Air Filter and Valve Unit • 12 Carbide Burs • 12 Mounted Points • 6 Rubber Chucks • 1 Chuck Insertion & Removal Tool • Plastic Tongs • Tubing and Fittings for connection to Thermex Dual Control.

$300 Complete



1 VIBRATIONAL FREQUENCY BEYOND PATIENTS' SONIC THRESHOLD

Higher speeds with rotary instruments are a material aid in the control of trauma.

Clinical work indicates that somewhere between 90,000 and 100,000 RPM the patient loses ability to tell when tooth structure is being cut. At these speeds, the patient is vibrationally unaware of cavity preparation.

2 UNBELIEVABLE FREEDOM OF CUT

All who have used the Page-Chayes have been impressed by the ease with which difficult cavity preparations are accomplished . . . a result of the unbelievable freedom of cut which this instrument affords. The bur, running at these speeds, may be laid on the margin without any tendency to jump.

3 GREATER CONTROL THAN EVER BEFORE

The Page-Chayes Contra Angle provides a heretofore unobtainable "control". The Page-Chayes lets you operate with a "light as a feather" touch . . . lets the instrument do the work — resulting in more accurate cavity preparation with increased efficiency and less fatigue. Only 2 to 4 ounces of pressure is required.

Literature and reprints upon request.

S. S. WHITE

DENTAL PRODUCTS

Look around the operating room of almost any successful dentist — and it's a safe bet you'll see S. S. White products. They belong there traditionally. Chances are they're the same make of products the dentist started with — and stayed with — because they do what is claimed for them. The name "S. S. White" is your assurance of this — on everything from burs to operating units. Take the first step to success by getting to know your S. S. White Dealer — or write to us. Incidentally, our free office planning service is at your disposal, too.

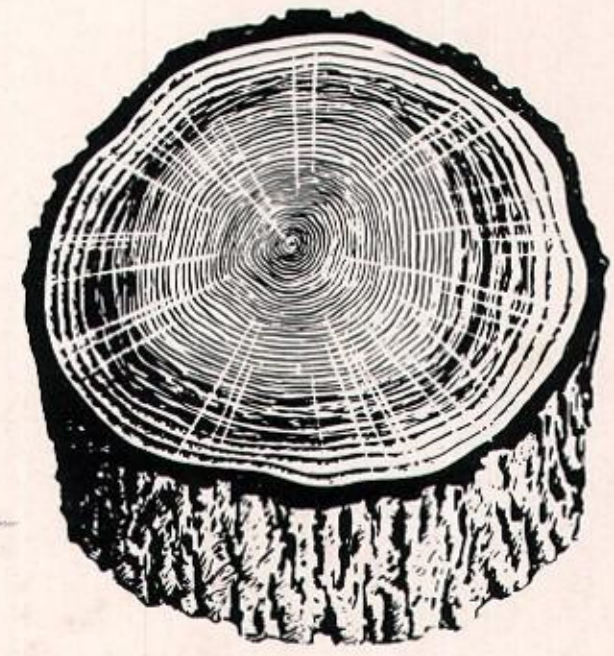
STRENGTH FROM STRUCTURE

Who hasn't seen *strength* in the *structure* of a tree? Just cut across a mighty trunk to find the secret—one year's growth bonded to another in a slow natural process that welds, compresses and laminates at the same time . . .



Nature develops the strength of natural teeth in much the same way by building a dense, homogenous internal structure. A similar internal structure is necessary to achieve greater strength in artificial porcelain teeth.

Only the vacuum fired porcelain of Trubyte Bioform Teeth has a dense, homogenous structure comparable to that of natural teeth. This exclusive Trubyte Bioform process creates not only *stronger* teeth, but more *natural*, *vital* and *lifelike teeth*.

CONVENTIONAL AIR FIRED PORCELAIN

TRUBYTE BIOFORM VACUUM FIRED PORCELAIN

Note in these two micro-photographs how the denser, more homogenous structure of vacuum fired porcelain is substantially free from the voids and bubbles found in conventional porcelain.

The greater strength and beautiful esthetics of Trubyte Bioform Vacuum Fired Porcelain offers a *new* opportunity for increased success in modern professional denture service.
